

Manaras RADIO031 & RADIO037 are MCR-32 Receivers

MODEL MCR-32 WIRING INSTRUCTIONS ON A MANARAS OPERATOR (WITH HARDWIRED CONTROL)

The model MCR-32 commercial receiver is provided with three isolated contacts, a normally open contact for OPEN, a normally open contact for CLOSE and a normally closed contact for STOP. Wire these contacts as you would a 3-button station.

For a typical installation using a receiver only (See figure 1): Connect Terminal #8 of the MCR-32 to Terminal #3 of the operator and to Terminal #6 of the MCR-32. Connect Terminal #6 of MCR-32 to Terminal #4 of the MCR-32. Connect Terminal #7 of the MCR-32 to Terminal #2 of the operator, Terminal #5 of the MCR-32 to Terminal #5 of the operator and Terminal #3 of the MCR-32 to Terminal #4 of the operator.

If you are using a 3-button station and a MCR-32 receiver (See figure 2): Connect the Terminal #4 of the MCR-32 to Terminal #6 of the MCR-32 and then Terminal #6 of the MCR-32 to COM of 3-button station. Connect Terminal #3 of the operator to COM of 3-button station. Connect the STOP of the 3-button station to Terminal #8 of the MCR-32. Connect Terminal #7 of the MCR-32 to Terminal #2 of the operator, Terminal #5 of the MCR-32 to Terminal #5 of the operator and then Terminal #5 to the CLOSE of the 3-button station. Connect Terminal #3 of the MCR-32 to Terminal #4 of the operator and then Terminal #4 of the operator to OPEN of the 3-button station.

To supply 24 Volts AC power to the receiver, connect Terminals #1 and #2 of the MCR-32 to Terminals #1 and #9 of the operator respectively.

Potentiometer located at top/left of the electronic board

FIGURE 1

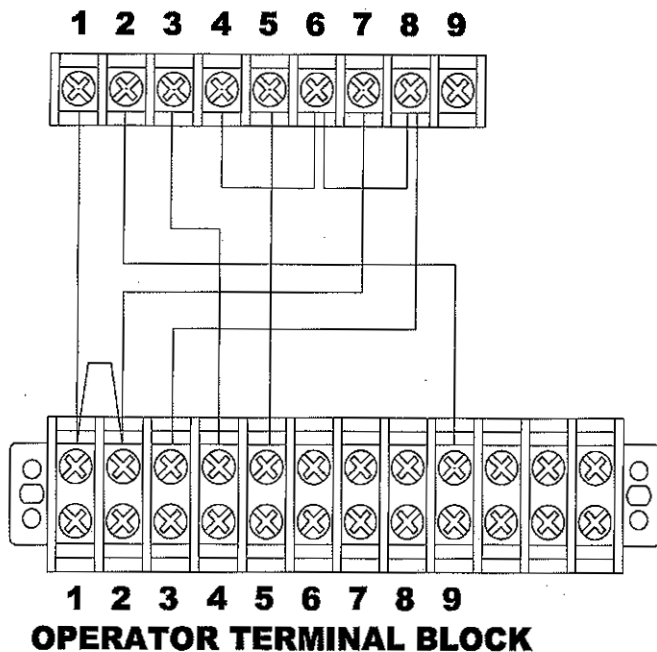

IMPORTANT (ADJUST ONLY WHEN REQUIRED)

NOTE: The quality of reception depends on several factors surrounding the Radio Receiver

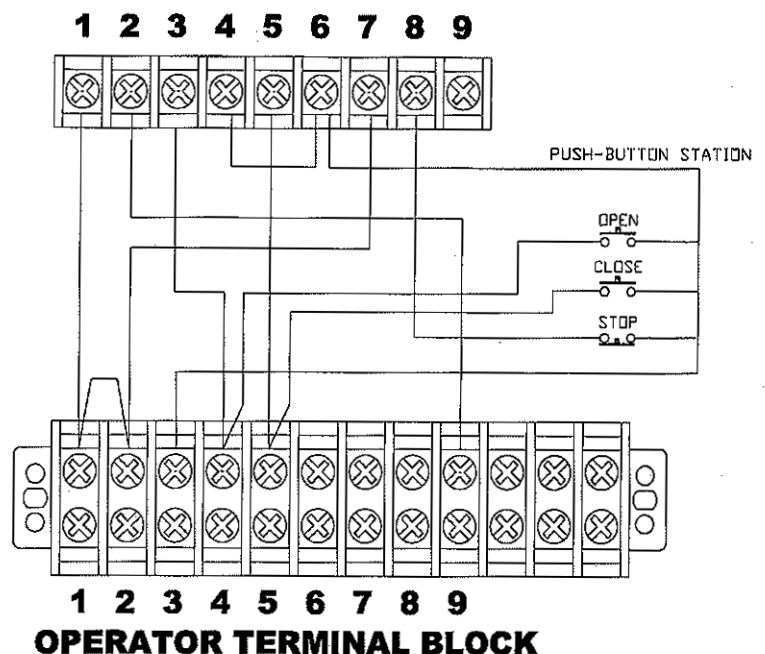

TO ADJUST: Turn the potentiometer clockwise or counter-clockwise gradually until you notice an increase in the reception range
